| 1 Antimony          | Demographic, medical and occupational history  
|                     | Records of personal exposure  
|                     | Physical examination with emphasis on the respiratory system and skin  
|                     | Urinary antimony level |
| 2 Beryllium         | Demographic, medical and occupational history  
|                     | Records of personal exposure  
|                     | Physical examination with emphasis on respiratory and dermatological systems  
|                     | Urinary beryllium |
| 3 Carbon disulphide | Demographic, medical and occupational history  
|                     | Physical examination with emphasis on the respiratory system and skin  
|                     | Urinary 2-thiothiazolidine-4-carboxylic acid level |
| 4 Cobalt            | Demographic, medical and occupational history  
|                     | Physical examination with emphasis on respiratory systems and skin  
|                     | Urinary cobalt level |
| 5 Cyclophosphamide  | Demographic, medical and occupational history  
|                     | Urinary cyclophosphamide |
| 6 Ethyl benzene     | Demographic, medical and occupational history  
|                     | Records of personal exposure  
|                     | Physical examination  
|                     | Baseline blood sample for haematological profile  
|                     | Urinary mandelic acid |
| 7 Nickel            | Demographic, medical and occupational history  
|                     | Physical examination with emphasis on dermatological and respiratory systems  
<p>|                     | Urinary nickel |</p>

| 8 Styrene          | Demographic, medical and occupational history  
                      Records of personal exposure  
                      Physical examination  
                      Baseline blood sample for haematological profile  
                      Urinary mandelic acid |
| 9 Toluene          | Demographic, medical and occupational history  
                      Records of personal exposure  
                      Physical examination  
                      Baseline blood sample for haematological profile  
                      Urinary hippuric acid or o-cresol or s-toluylmercapturic acid |
| 10 Xylene          | Demographic, medical and occupational history  
                      Records of personal exposure  
                      Physical examination  
                      Baseline blood sample for haematological profile  
                      Urinary toluric acid |
